Experience

Adatafy / Novaspect Chicago, IL
Software Engineer II | Field Engineering & Industrial Solutions Architecture *June 2022 - Present*

- Delivered **10 enterprise industrial software implementations** across pharma, biofuels, campus utilities, food, and chemicals for **30-150 users**. Owned technical discovery, solution architecture, integrations, **UAT/validation**, go-live, training, and hypercare.
- Unified siloed **MES, historian, CMMS, SAP/ERP, and equipment-log** data across **SaaS, on-prem, and hybrid** plants. Resolved mismatched asset IDs, duplicate events, and historian gaps with REST/JSON APIs, structured mapping, and system acceptance testing.
- Led use-case workshops and **30-40 tailored technical demos per year** for operators, plant IT/validation, and site directors. Translated functional and non-functional requirements into **reference architectures**, Jira backlogs, and phased rollouts.
- Built **Python and PowerShell** deployment automation plus TypeScript/Python workflow functions (routing, validation, 20-55 unit tests per function). Cut manual setup effort by up to **60%** and established reusable runbooks and deployment methodology.
- Built **LLM-powered SME assistants** in Augmentir with prompt templates, knowledge structuring, and response guardrails. Channeled field friction into **product requirements** for vendor teams and reusable enablement for sales and field engineers.

NVIDIA Corporation Santa Clara, CA
Enterprise XR Technical Product Management Intern *May 2021 - August 2021*

- Developed enterprise XR demos in **Unity** using **CloudXR** and **AWS EC2**, supporting internal testing, customer discovery, and product discussions with medical education stakeholders.
- Supported a Swiss VR medical-training startup with CloudXR setup and integration, translating partner needs into technical enablement and helping initiate an early product partnership.

Dolby Laboratories San Francisco, CA
Enterprise Applications Project Management Intern *January 2020 - August 2020*

- Integrated a project management platform across Finance, Marketing, and Legal teams, reducing cross-team sync meetings by **50%**.
- Introduced Agile workflows for internal IT delivery, reducing project cycle times by **30%** and improving stakeholder alignment and release coordination.

Projects

PharmaOps Copilot | CDF-ready industrial agent prototype GitHub

- Built a **CDF-ready** pharma deviation-triage prototype that contextualizes siloed **IT/OT/ET** exports (MES, historian, CMMS, QMS, engineering) into one model, mapped to ISA-88/95, Records-style events, and a PharmaDeviation extension.
- Shipped an evidence-first industrial agent over **GPT-4, Claude, and Gemini**: deterministic tools and hybrid RAG, then optional narrative. **21/21 evals** including jailbreak refusal. Exports **Atlas agents-as-code** YAML, Industrial MCP-shaped tools, and field-friction notes on identity, units/clocks, and policy guardrails.

Education

Iowa State University | College of Engineering Ames, IA
Bachelor of Science in Computer Engineering with a Minor in Data Science

Skills

- **GenAI & Agents:** Python, prompt chaining, embeddings / hybrid RAG, evidence-first agents, eval harnesses, GPT-4 / Claude / Gemini, guardrails, MCP
- **Industrial Data & OT/IT:** MES, historians, CMMS, SAP/ERP, equipment logs, identity resolution, SaaS / on-prem / hybrid, validation / GxP workflows
- **Field & Pre-Sales Engineering:** technical discovery, use-case workshops, reference architectures, Fast AI prototyping, demos, UAT, go-live, product feedback
- **Engineering:** TypeScript, JavaScript, PowerShell, SQL, REST APIs, Git, CI/CD, Postman, Jira

Certifications & Activities

- AI for Product Management certification, Mind the Product 2025
- High Impact Presentation certification, Dale Carnegie Training 2024
- Trackside hospitality volunteer, Circuit of the Americas Formula 1 Grand Prix 2022
