Experience

Adatafy / Novaspect Chicago, IL
Software Engineer II, Enterprise Solutions *June 2022 – Present*

- Delivered approximately **10 end-to-end industrial software implementations** across pharma, food, utilities, biofuels, and chemicals; owned discovery, design, configuration, integrations, UAT, training, go-live, and hypercare while managing up to **five concurrent projects**, including two enterprise rollouts, to deadline.
- Led **cross-functional discovery** with executives, IT, vendors, plant managers, and lead operators; mapped operational workflows into solution designs, data models, **Jira user stories**, acceptance criteria, release plans, and configured platform capabilities.
- Led client-side design and validation for the first **Shiftconnector (Seqonis)–SAP PM** integration; shaped use cases, contributed to development, and tested flows mapping asset, material, maintenance-notification, and work-order data into operator workflows, helping convert the solution into a **reusable offering**.
- Conceived enhancements and wrote core code for a **one-click testing product** for a Fortune 500 food manufacturer, automating approximately **50 tests across 11 functions** connecting Augmentir, a central data fabric, and SAP/ERP; coordinated dashboard, report, and email capabilities deployed across sites in the United States and Mexico.
- Designed **source-to-destination field mappings**, cleaned and structured functional-location and asset data for imports, and migrated **historical operational data** between historians; validated transformations and data relationships before customer UAT and production release.
- Created reusable Seqonis configuration and deployment tools that reduced manual setup by up to **60%**; redesigned the workflow-project delivery lifecycle and built **LLM-powered operator-assistance workflows** with structured knowledge, prompt guardrails, and user-feedback iteration.
- Administered **SQL Server** for Shiftconnector deployments and wrote **T-SQL** export queries using joins, date filters, and aggregations for user entries and time periods.

NVIDIA Corporation Santa Clara, CA
Enterprise XR Technical Product Management Intern *May 2021 – August 2021*

- Developed enterprise XR prototypes in **Unity**, **CloudXR**, and AWS EC2, supporting internal validation, customer discovery, and product discussions with medical-education stakeholders.
- Translated partner requirements into technical enablement for a Swiss VR medical-training startup, resolving **CloudXR** setup and integration needs and helping initiate an early product partnership.

Dolby Laboratories San Francisco, CA
Enterprise Applications Project Management Intern *January 2020 – August 2020*

- Led requirements and workflow standardization for an enterprise application rollout across Finance, Marketing, and Legal, reducing cross-team synchronization meetings by **50%**.
- Introduced **Agile** delivery workflows for internal IT initiatives, reducing project cycle times by **30%** while improving roadmap visibility, stakeholder alignment, and release coordination.

Education

Iowa State University | College of Engineering Ames, IA
Bachelor of Science in Computer Engineering, Minor in Data Science
Capstone: Led product design and frontend development for a recipe application, driving **70%** user retention through user-feedback iteration and Agile delivery.

Skills

- **Product & Implementation:** Customer discovery, business-process mapping, requirements, user stories, acceptance criteria, product configuration, Jira backlogs, UAT, go-live, training, hypercare, enterprise rollouts
- **ERP & Operational Systems:** SAP PM, SAP/ERP integrations, work orders, maintenance notifications, asset and material data, functional locations, MES, connected-worker platforms, CMMS, historians
- **Data & Integrations:** SQL, T-SQL, SQL Server, REST APIs, JSON, Postman, source-to-destination mapping, data transformation, master-data preparation, historical-data migration, validation
- **Engineering, AI & Automation:** TypeScript, JavaScript, Python, PowerShell, automated testing, LLM workflows, prompt engineering, response guardrails, Git, CI/CD, Jira, Confluence

Certifications & Activities

- AI for Product Management certification, Mind the Product 2025
- High Impact Presentation certification, Dale Carnegie Training 2024
